

PROTECTIVE GLASSES

✦ Lens type/Тип линз: 

📦 Packing: 6/36[szt]

📏 Package: 18x100x100 cm/5-9 kg

Chipproof protective glasses in the TREMOR line.

- optical class 1
- temples and the top part of the frame are made of a single element
- a streamlined shape of the frame and slightly rounded lenses ensure a better adjustment of the glasses to the face
- dielectric properties - they do not contain metal elements
- at the ends of temples there are gel insertions, due to which the glasses do not slide
- an additional nose rest made of gel, prevents impressions and increases the comfort of use
- perfect for working during metal, wood, ceramics working etc.
- check the properties of the lenses and choose the most suitable ones for a given type of work
- they conform to the requirements of the EN166 standard
